

censhare 2019.3

Release presentation 15th November 2019

censhare 2019.3 Agenda

- ecosphere: Product overview
- Feature overview
 - Support for 3D models
 - Acrolinx integration
 - Properties Editor
- Dedicated Solutions
 - Workspace makeover
 - Approvals
 - Master data and configuration

Features

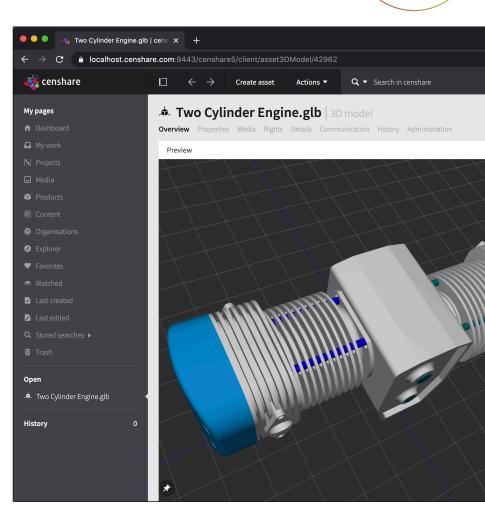

censhare 2019.3 **DAM: Support for 3D models**

Why

It's clear that the future has more dimensions than today. The need of creating new types of content requires new types of media files. By allowing our clients to, now also, visually work with 3D files enables them to reach their audience in these mediums of tomorrow.

What

- Rendered interactive previews for all relevant 3D file formats
- Actions to store static preview, reset camera position, toggle wireframe and background color
- Support for fullsize preview

censhare 2019.3

DAM: Support for 3D models

- Newly supported formats
 - 3DS: 3D Studio Scene
 - *3MF*: 3D Manufacturing File
 - AMF: Additive Manufacturing File
 - *AWD*: Away3D Document
 - Babylon: Babylon File
 - DAE: COLLADA Exchange File
 - *FBX*: Autodesk FBX Interchange File
 - *GLB*: GL Transmission Format (Binary)
 - *GLTF*: GL Transmission Format (JSON)
 - *OBJ*: Wavefront 3D Object File
 - *STL*: Stereolithography File
- Next step: Support for texture files

| | neither nor Avoid neither nor when possible. |
| | I be I am Should this verb be singular or plural? |
| am about to pen, I neither expect nor solicit belief. Mad indeed would I be to expect dence. Yet, mad am I not - and very surely do I not dream. But to-morrow I die, and ose is to place before the world, plainly, succinctly, and without comment, a series | very surely surely : Do you really need this word or phrase? |
| se events have terrified - have tortured - have destroyed me. Yet I will not attempt to Horror - to many they will seem less terrible than baroques. Hereafter, perhaps, antasm to the common-place - some intellect more calm, more logical, and far less | Avoid unnecessary words or phrases that don't add meaning to your text. |
| umstances I detail with awe, nothing more than an ordinary succession of very | MORE INFORMATION |
| anity of my disposition. My tenderness of heart was even so conspicuous as to make f animals, and was indulged by my parents with a great variety of pets. With these I | My events |
| en feeding and caressing them. This peculiarity of character grew with my growth, | L |

will ... attempt

Why

Content creation is a team effort and an act of collaborative work. To support the collaborative model and ensure text quality and consistent corporate communication we integrated Acrolinx, a content optimization tool.

What

Acrolinx is an artificial intelligence engine that supports content creation. The tool analyses and suggests content optimizations and helps with the alignment of teams creating content. It enables companies processes to create brand and target optimized content.

The "Acrolinx Content Analyzer" integration is available in the standard workspace of assets using the Content Editor.

censhare 2019.3 **DAM/PIM: Properties Editor**

Documentation

Why

censhare manages millions of assets, the users supporting these systems need a tool to manage multiple, and in many cases, masses of data and assets at once. A Properties Editor designed for mass editing enables you to do exactly that.

What

A new edit page allowing you to edit defined properties of multiple assets in a table view.

- Support for mass assets
- Support for all data types
- Support for copy & paste within a column
- Undo and redo
- Support for related and referenced assets

Dedicated Solutions

Background

Dedicated Solutions

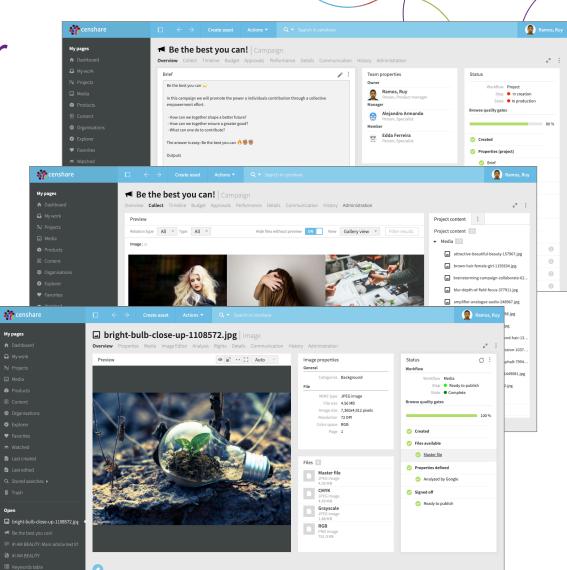

| Why | How | Business benefits |
|---|---|--|
| Prospects and partners have been asking for standardized solutions to speed up provisioning of demo systems as well as easier implementation in projects Clients have been asking for a more intuitive and consistent way of working | Key learnings and best practices from around the world used as foundation for dedicated configurations with refactored workspaces, workflows and navigation The result: dedicated solutions that work out-of-the-box for common censhare use cases | Faster provisioning of demo systems for prospects Faster time-to-market with actual client projects More intuitive use of censhare Reduced training effort for new censhare users |

Complete workspace makeover

Complete workspace makeover

We have performed a makeover and facelift of the entire* workspace concept.

- Pages are clear, fresh, consistent and in general more intuitive to use for both new and experienced users
- The entire workspace follows a holistic approach to create consistency between both asset pages and asset types
- Focus on individual users and their needs
- Designed to support the dedicated master data

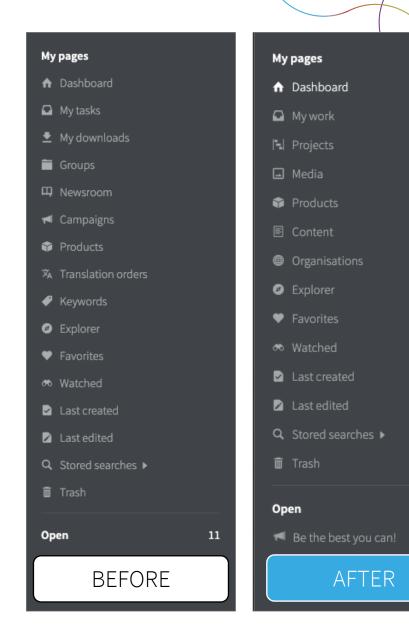

💏 censhare

Enhanced left navigation

New sections better reflect the product philosophy, strengths and capabilities:

- Media (DAM)
- Products (PIM)
- Content (CMS)
- Projects, Organizations and user specific information have been consolidated under "My work"

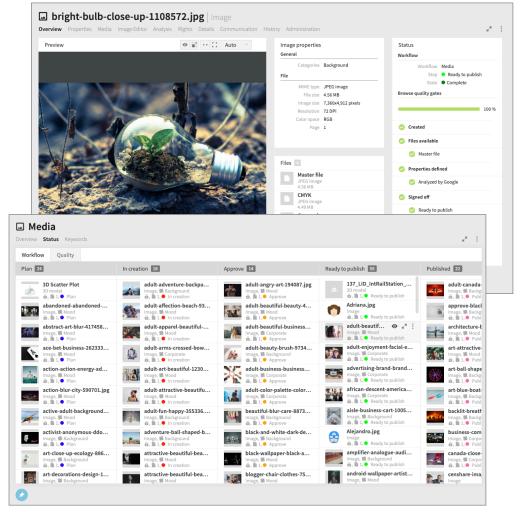

Media: Plan, create, enrich, approve and publish

Digital Asset Management is at the heart of the censhare solution.

Working with media assets (image, videos, audio, 3D model) is an integrated, smooth and intuitive experience across the entire solution.

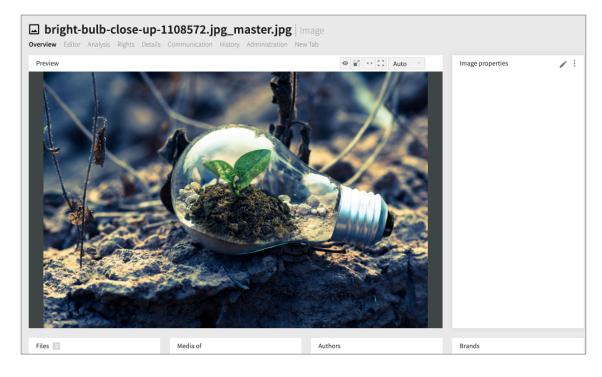

The makeover consists of:

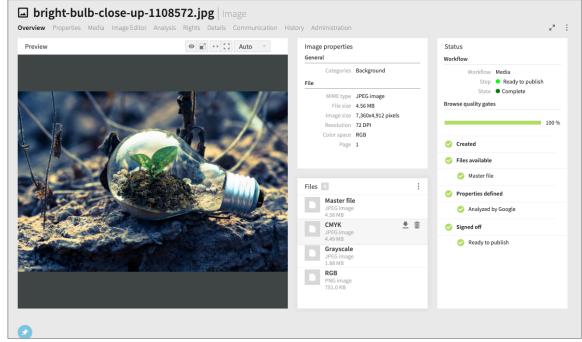

- Consistency with other asset types (product & content)
- Dedicated tables & widgets
- Refurnished asset pages and left navigation entry point

Consistency across all media types

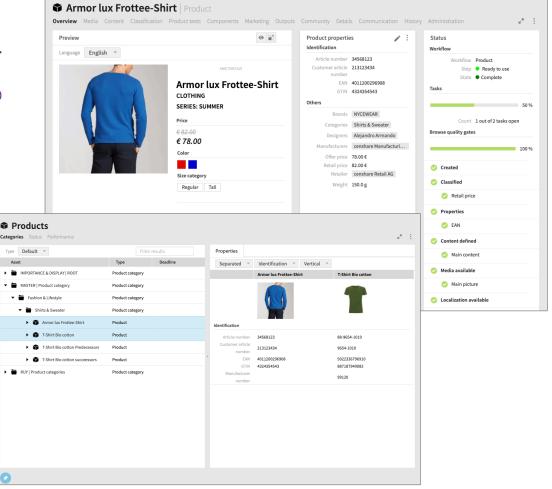

Products: Plan, create, organize and classify

censhare Product Information Management helps you understand complexity, organize and classify products in all shapes and forms.

An intuitive user experience helps you going to the correct place to perform required tasks – all tightly connected to both media and content assets.

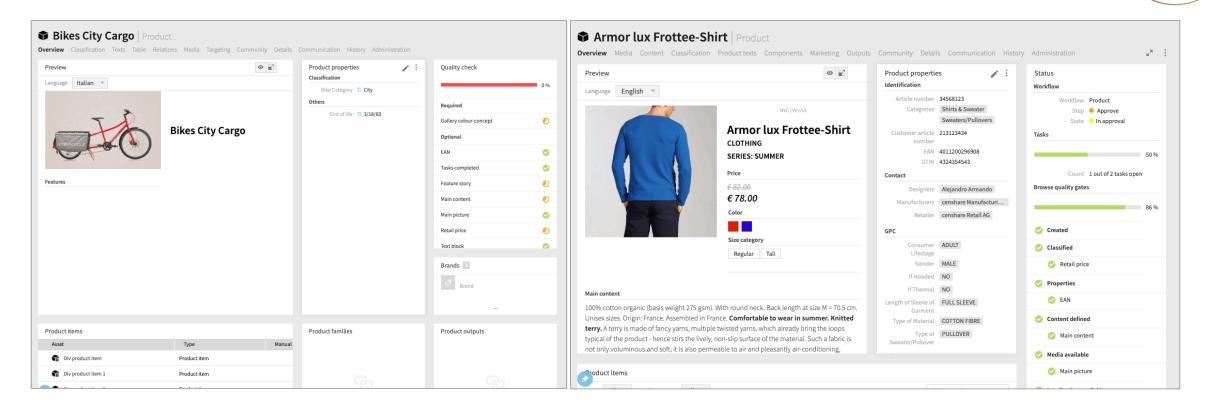

The makeover consists of:

- Consistency with other asset types (media & content)
- Dedicated tables & widget
- Refurnished asset pages and left navigation entry point

Consolidated, simplified and structured

BEFORE

Content: Following the "Content First" approach

Content Management and its processes has been our core expertise for many years, and we've been leading the way for our clients to produce Omnichannel content using the content-first approach.

The makeover consists of

- Consistency with other asset types (media & products)
- Dedicated tables & widget
- Refurnished asset pages and left navigation entry point

Approvals

Dedicated solutions highlights Approvals

Approvals and approval processes are a common use case for censhare clients. The new approvals configuration enables users to easily and intuitively create new and adapt or remove existing approvals. It's included in the Dedicated Solutions for Project and Subject assets.

This configuration feature allows for:

- Configuration within censhare Web and the common resources domain
- Easy adaption to any other asset type

Master data & assets

Master data & assets

Dedicated Solutions come with master data. In order to not interfere or corrupt existing client setups with the dedicated master data we have placed it in an *optional* part of the system.

Dedicated master data includes:

- Domain model
- Role configurations
- Workflows
- Sample users
- Templates
- Dedicated modules and features

Corporate

Dedicated solutions highlights Documentation

Our solutions should be well received and understood by any interested party, and we have created a compelling documentation.

The documentation includes:

- A new PIM Setup Guide
- Data model definitions (what is supposed to be related to what)
- Explanations of the Workspace concept
- Explanations of individual Workspace pages and scenarios
- Explanation of "How to incorporate the Dedicated Solutions"

Product documentation
